DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claim 15 is withdrawn in view of the determination that the recitation of a “non-woven traction member” constitutes new matter. Although this amendment was entered prior to the indication of allowable subject matter, it was an oversight that there was no support for this amendment in the specification or the previously filed claim. Upon further inspection, it has become clear that the term “non-woven” was not in the application as originally filed.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 15 recites a non-woven traction member. There is no support for this language in the specification or the originally filed claims and therefore, it has been determined that this recitation constitutes new matter.
